

MARINE REFIT STORAGE TRANSPORT PROTECTION

INTRODUCTION

Tufcoat is a leading provider of **environmental containment** and **weather protection** systems for the marine industry.

We supply a **shrink-wrap sheeting system** to create a 'drum tight' cover providing **protection** for **yacht transport** or **storage** and **marine refit projects**.

Our **customers are based throughout Europe** and are involved in boat, yacht and ship building, the superyacht industry and Naval Defence refits.

SERVICES

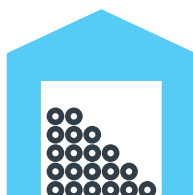

INSTALLATIONS

Providing an installation service using **experienced teams** based in the UK and **throughout Europe**, we are able to complete **projects of any size**.

Tufcoat is widely installed in the **Mediterranean** for the **superyacht** industry with a **partner in Palma**.

Teams in the UK provide installation services to **Naval Defence refits** and superyachts as well as the **leisure boat market**.

MATERIALS

We can supply **materials and accessories** with European standards for the creation of **shrink-wrap covers, superyacht tents** and **refit shelters**.

As a **manufacturer** with **European stockists**, we can maintain stock levels to **meet demand** with products **dispatched and delivered within 24 hours***.

We ensure project **requirements** are met **quickly and effectively**.

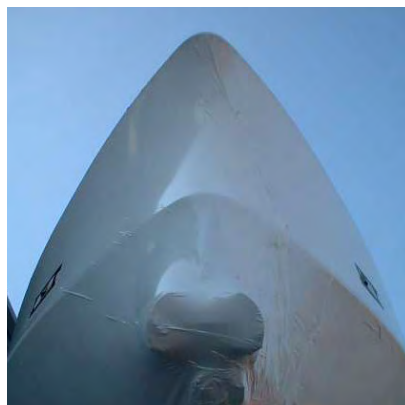

TRAINING

Tufcoat deliver an **introduction to working with shrink-wrap** training course.

Designed by **industry professionals** for **marine applications**, training consists of a practical seminar and an introduction to **skills** needed to **install Tufcoat shrink-wrap**.

The shrink-wrap training also covers equipment and **product familiarisation**, best practices and basic **health and safety advice**.

*subject to location & time of order

APPLICATIONS

REFIT

Temporary refit shelters or tents can be created using Tufcoat shrink-wrap to provide complete environmental containment around a refit or maintenance project.

Temporary shelters **allow sensitive applications** like painting and deck repair to be undertaken in a controlled environment by using ventilation, extraction, dehumidification and temperature control.

Outside space can be **utilised** by erecting a scaffold structure around a vessel, completely sealing the area to **create a cocooned work habitat**.

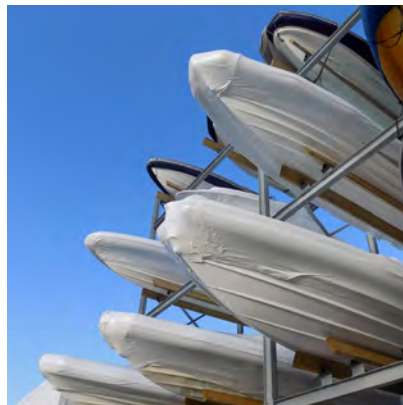

STORAGE

We offer an **alternative** for marinas, boat-builders and owners frustrated with using **tarpaulins** or **canvas** covers to protect their boats.

Tufcoat marine shrink-wrap protects boats during bad weather or when in dry stacks. The use of self adhesive vents and desiccants, minimises moisture which can build up during storage.

When preparing boats for use shrink-wrap can be removed by cutting away the film and bundling for recycling, **avoiding storage and maintenance costs**.

TRANSPORT

Whether transporting vessels by low-loader, trailer or as sea freight **Tufcoat prevents exposure** to the elements, environmental factors and other **contaminants**.

Tufcoat sheeting **shrinks 'drum-tight'** around a boat, meaning that vibration and damage typically associated with **loose fitting tarpaulins** is avoided.

By **encapsulating a boat** during transport, boat manufacturers, transporters and brokers ensure that vessels are **delivered in pristine condition**.

Temporary Shelter, Concarneau

FEATURES

WEIGHT & SIZE

The rolls are designed to be of optimum handling size and weight to increase the ease of application. However, we can manufacture products in sizes and weights to suit any specific client requirement.

ADDITIVES

A variety of Tufcoat formulations contain additives with different properties to cover a wide range of applications and include:

ULTRA VIOLET INHIBITORS

FLAME RETARDANT

VCI - ANTI-CORROSION

ANTI-STATIC

COLOURED*

PRINTED*

HIGH-STRENGTH

PUNCTURE RESISTANT

TEAR RESISTANT

*Coloured and printed options are available subject to MOQ

CERTIFICATION

QUALITY & SAFETY

Tufcoat products are thoroughly tested and subjected to the most demanding conditions and environments.

Through ISO9001, BS EN 13501, M1 & LPS certification we offer confidence with internationally recognised accreditations, supporting our customers in accessing global markets by adhering to industry quality and safety regulations.

PRODUCTS

190µm - Regular Grade Shrink-wrap

Code	Product size	Kg*
BC01	5m x 70m	71
BC12	6m x 60m	72
BC02	8m x 50m	78
BC13	10m x 40m	80
BC03	12m x 30m	72
BC04	12m x 50m	112
BC07	14m x 50m	135
BC09	12m x 50m Flame retardant	110

250µm/ 300µm - Heavy Grade Shrink-wrap

Flame retardant to BS:EN13501 Class B, M1, LPS 1207/1215

Code	Product size	Kg
BC06	12m x 40m 250µm	115
BC08	7m x 15m Flame retardant	35
BC11	12m x 15m Flame retardant	55

Patch Tape

Code	Product size	Kg
BC16	100mm x 33m	1.5

Polywoven Strapping

Code	Product size	Kg
BC24	19mm x 640m	7.5

Ventilation

Code	Product size	Kg
BC28	Self adhesive air vents	0.20

Zippered access

Code	Product size	Kg
BC31	Hatch door 0.9m	2.4
BC32	Hatch door 1.2m	6
BC33	Hatch door 1.8m	3.6
BC34	Self adhesive zips 1.8m	5
